INTERNSHIP

Zidio Development

- **Task Management**
- Developed a responsive task management web application using HTML and CSS, enabling efficient task organization, assignment, and progress tracking. Implemented features like task prioritization, deadline tracking, and role-based access to enhance team collaboration and productivity.

PROJECTS

Facial Emotion Recoginition

Developed a deep learning–based facial emotion recognition system using a hybrid architecture combining ResNet18 and Transformer Encoder (ViTFER) on the FER2013 dataset.

The model captures both spatial and global features to improve classification of human emotions. Implemented a complete pipeline including data preprocessing, training, evaluation, and real-time webcam-based inference.
